

The Laboratory of Reproductive Medicine presents

# REPRODUCTIVE JOURNAL CLUB

## BISPHENOL S AS A DANGEROUS PLASTIC COMPOUND: A SCARY MOVIE OF REPRODUCTION HEALTH

Thursday 16<sup>th</sup> May, 3 p.m.  
seminar room of Biomedical center  
(no longer than 20 min., accompanied by small refreshment)

Bisphenol S belongs to endocrine disruptors mainly affecting reproductive health. Widely used bisphenol-containing plastic items surround mankind wherever and negative effect of bisphenol S is considered. Indeed, female reproduction seems to be endangered!

Following brief talks will be given:

**Kamar Ghaibour:** Extremely low doses of Bisphenol S affects quality of matured mouse oocytes

**Kateřina Benešová:** Bisphenol S negatively effects the quality of mice ovaries
