

The Laboratory of Reproductive Medicine presents

prof. Jean-Francois BODART

visiting professor at Faculty of Medicine in Pilsen
and his lecture entitled

O-GLCNACYLATION & S-SULFHYDRATION: SWEET AND SMELLY SIDES OF CELL CYCLE REGULATION

How to modulate cell cycle and its progression through post-translational modifications of crucial proteins? Recently, the creation and role of certain post-translational modifications remain still unclear while the utilization of this knowledge is essential for drug investigation and cure. The future of medicine belongs to post-translational modifications!

Thursday 14th September 2017, 3 p.m.

seminar room of Biomedical center

The lecture will be about 30 min., accompanied by small refreshment.
